OPPORTUNITY · LODGES

Lodge operator prospectus

Two long-term lodge concessions on Mount Zulia and the Himan River, beside Kidepo Valley National Park.

Zulia Conservancy (Uganda) Limited · NFA Licence No. 30 · zuliaconservancy.org · chris@zuliaconservancy.org

THE OPPORTUNITY

Two lodge concessions on the roof of Karamoja

Zulia Conservancy holds a licence from Uganda's National Forestry Authority over the Zulia Central Forest Reserve: the mountain, plateau and escarpment that rise beside Kidepo Valley National Park. We are offering two long-term lodge concessions to experienced operators, and will support a third, community-owned rest camp at the reserve gateway.

Zulia does not build or run lodges. Operators bring the design, the capital and the guests; we bring the land, the permissions route, the security umbrella, exclusive traversing over country no one else can sell, and a conservation story that guests can see working.

The Summit Eyrie

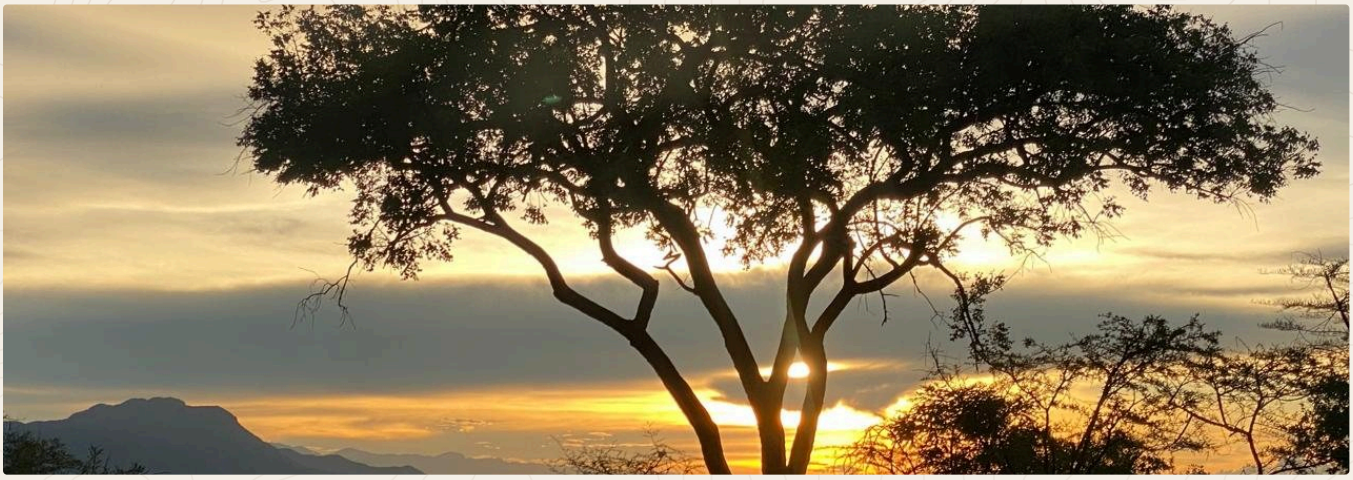

A small, exclusive camp a hundred metres below the summit of Mount Zulia, at 2,190 m, inside the reserve's no-hunting sanctuary.

The River Bluff

A larger lodge on a granite shoulder 190 m above the Himan River, two kilometres from the road, with the whole massif behind it.

The Town Kopje

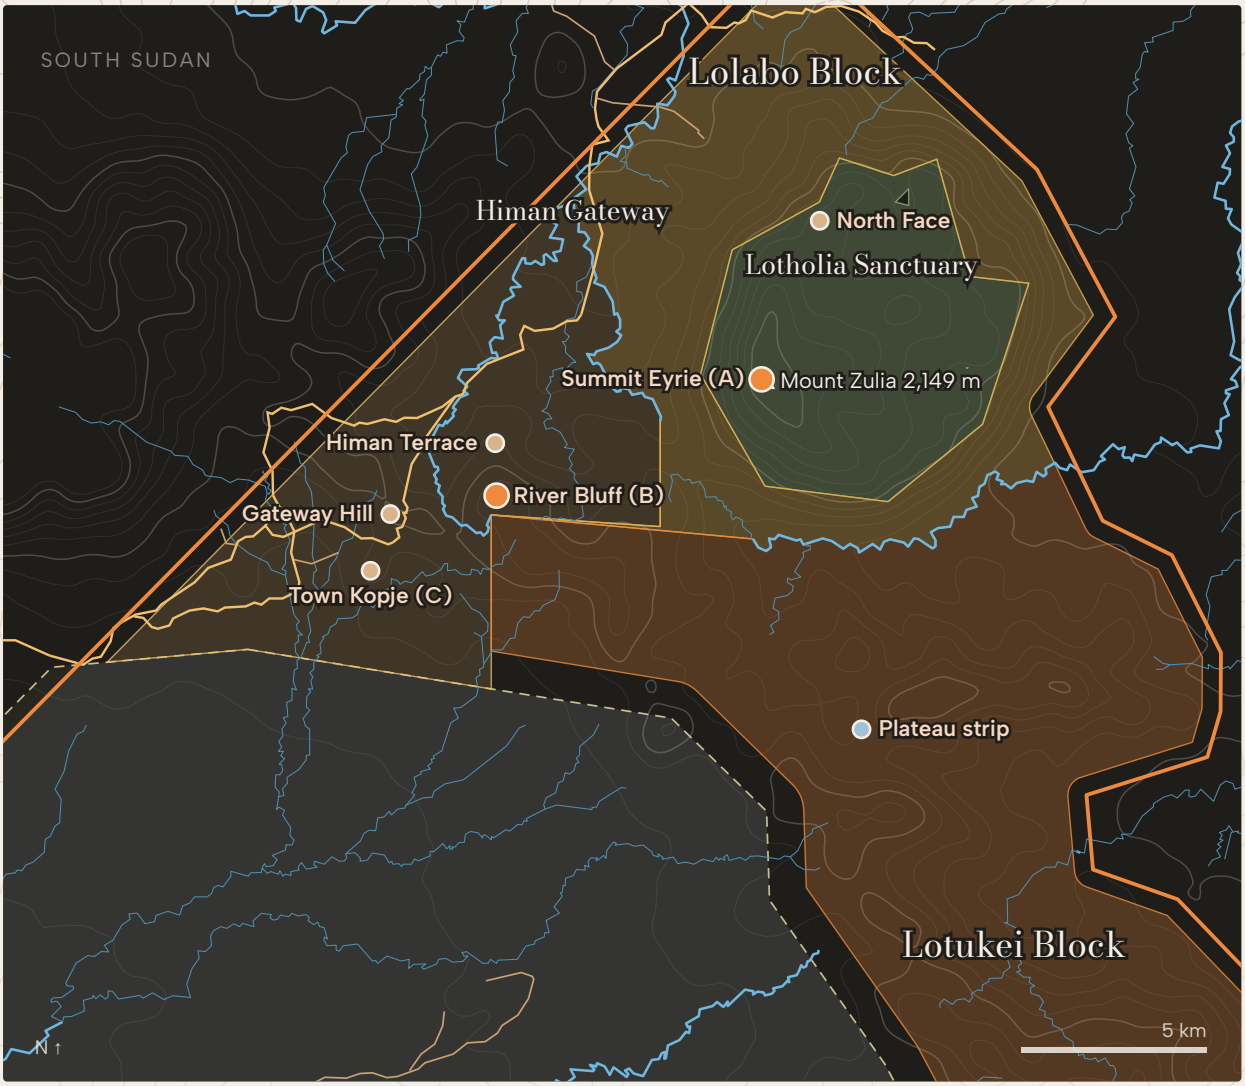

A community-run rest camp and visitor point at Himan, where the road meets the reserve.

Evening on the Zulia plateau.

THE SITES

Where they are

Concession sites A and B in orange; alternates in sand. Both concession sites lie in parts of the reserve that are never hunted. The full catalogue of 30 surveyed sites is in our Lodge Sites report.

What guests get. The highest ground in the Kidepo system, with views into South Sudan, Kenya and across the Kidepo plains; walking on the mountain and the plateau; game drives across the reserve; the Ik and Dodoth cultures of the highlands; and the national park on the doorstep.

How they arrive. By road from Kidepo or Kaabong, or by light aircraft to a plateau airstrip planned for the reserve. Our aviation partner can support charter access from Entebbe and Kampala.

THE MODEL

How a concession works

Term	Long-term sub-lease under our NFA licence, with NFA consent. We expect around 25 years for a full build.
Fees	A conservation fee per guest-night with a guaranteed annual minimum, reviewed on a fixed schedule. Never a share of the operator's profit.
Community	A per-guest-night community levy, shown on the guest's bill and paid to the community trust; a strong local hiring and training commitment.
Exclusivity	No other accommodation within the lodge's viewshed, and a cap on commercial beds across the reserve for the early years.
Traversing	Year-round walking and game drives in the sanctuary and gateway; across the wider reserve on a shared calendar with our other partners.
Footprint	Tented or light-footprint design, solar power, removable structures on the summit, and an environmental assessment led by the operator.
What Zulia provides	The land right and NFA liaison, ranger cover, access tracks and the plateau airstrip, community agreements, and wildlife monitoring that guests can join.

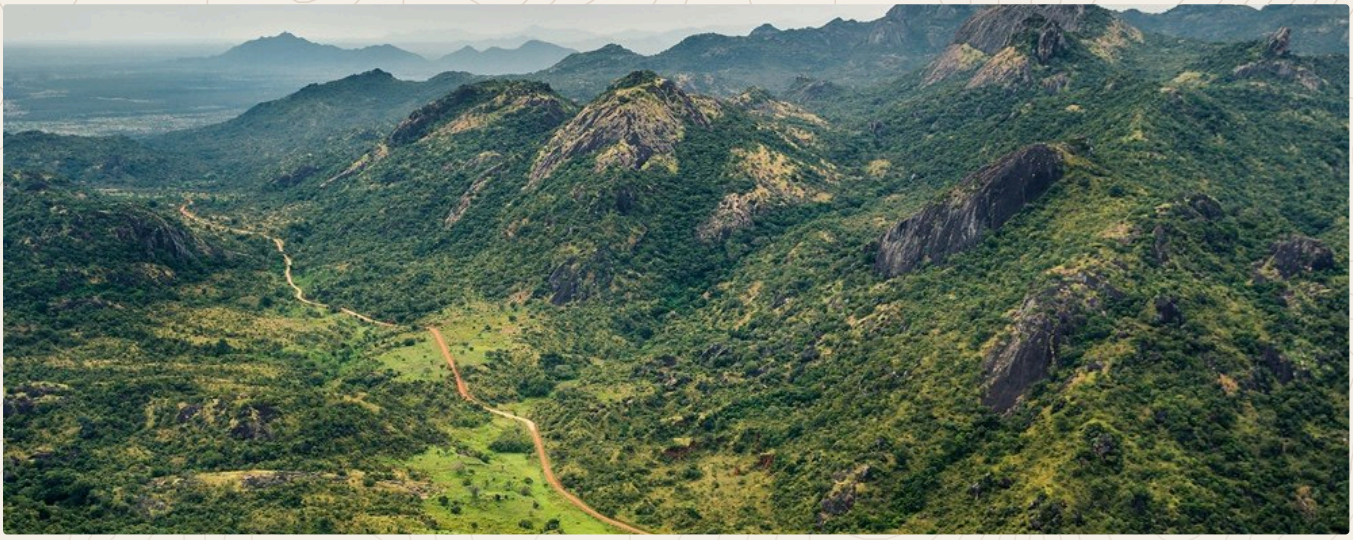

What we look for

- A record of running remote camps well and filling them.
- Funding certainty and a realistic build date.
- Guiding and conservation standards that match a recovering wildlife area.
- A genuine commitment to employment and enterprise in Kaabong district.

PROCESS

How to take part

1. **Expression of interest.** A short letter: the company, the site or sites of interest, comparable camps, and the concept.
2. **Information pack and site visit** for shortlisted operators, in the dry season (early 2027).
3. **Proposal** against our term sheet: design, build plan, fee offer, community and conservation commitments.
4. **Heads of terms**, then NFA consent, environmental assessment and community agreement before the lease is signed.
